

ODIGO

AI ROBOT ASSISTANT FOR SUPERMARKET

INTRODUCING ODIGO

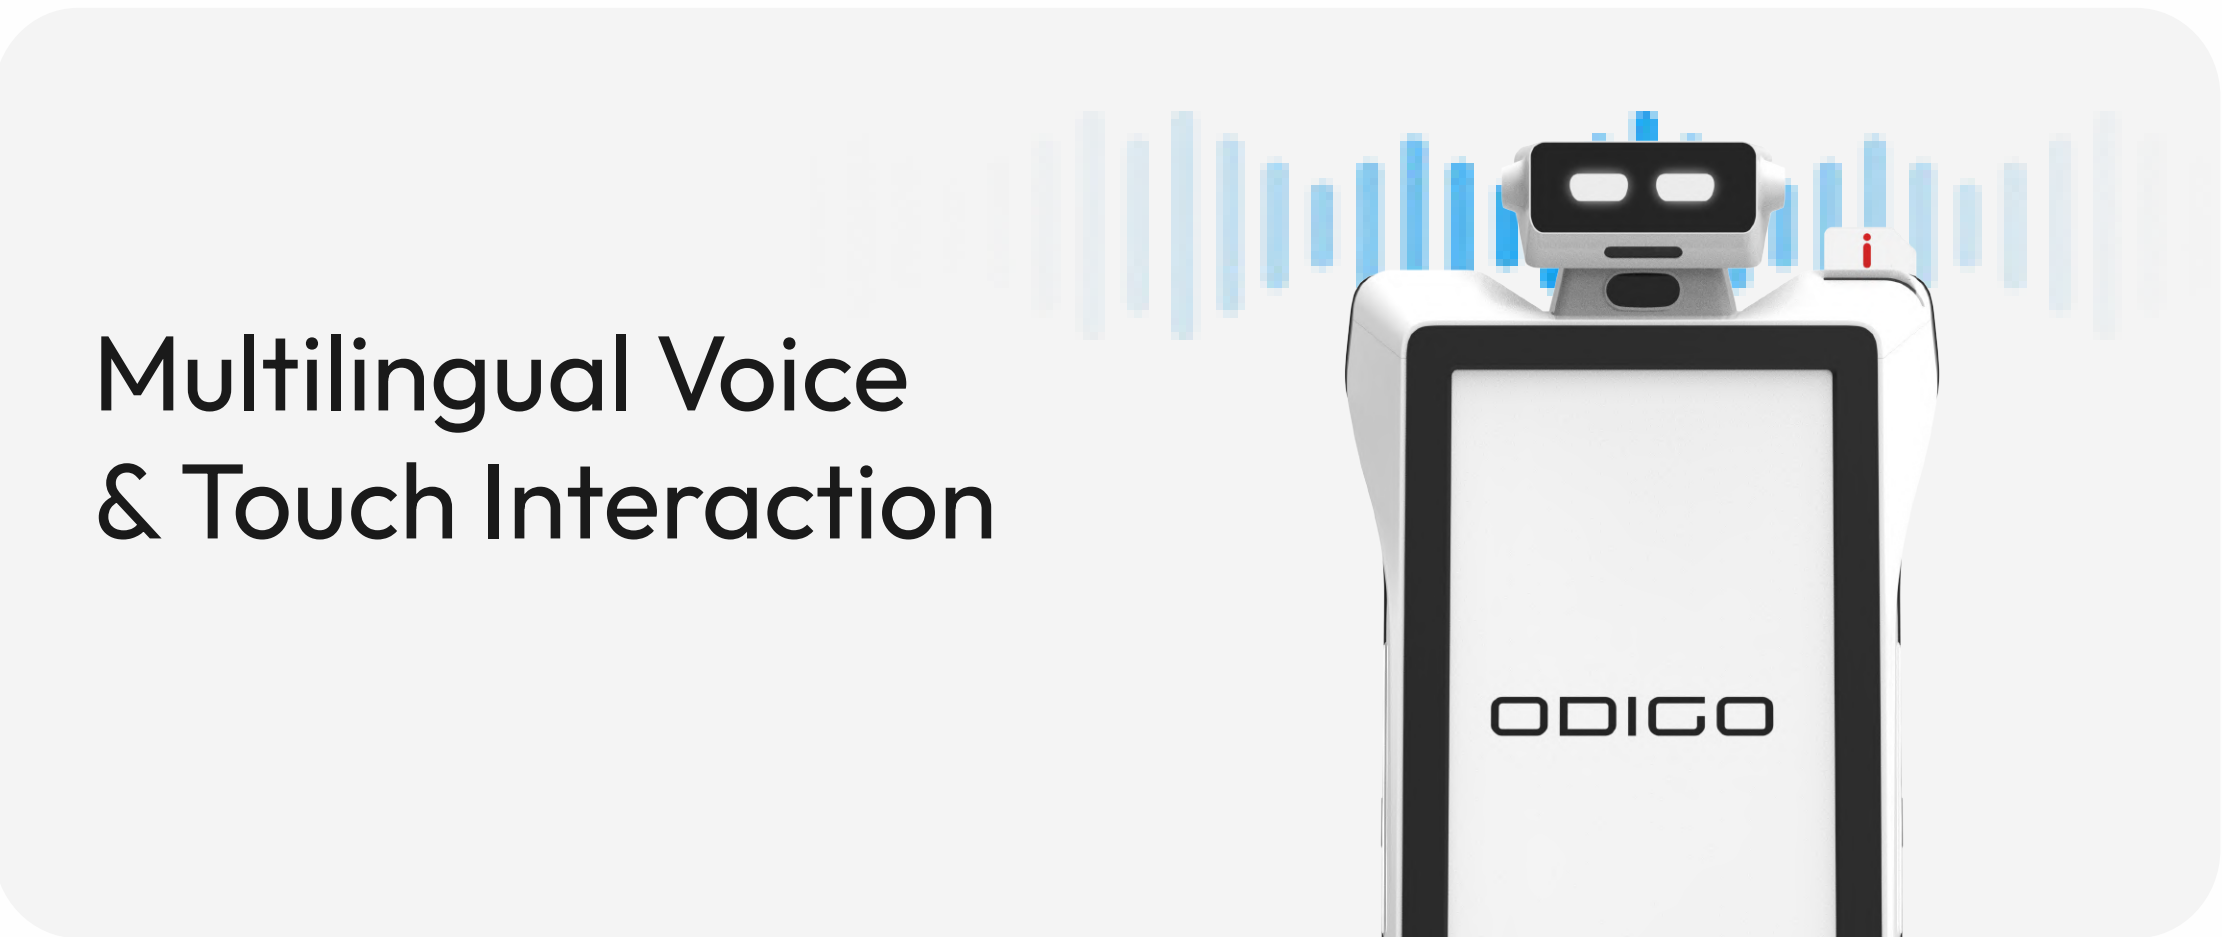

DESIGNED FOR SUPERMARKETS

Odigo brings interactive assistance directly onto the supermarket floor. It helps shoppers search for products, access relevant information, find destinations, and receive guidance through voice or touch.

It also keeps promotions moving through the store, monitors configured safety conditions, and records useful interaction data. The result is a more accessible shopping experience with clearer visibility into what shoppers ask, explore, and engage with.

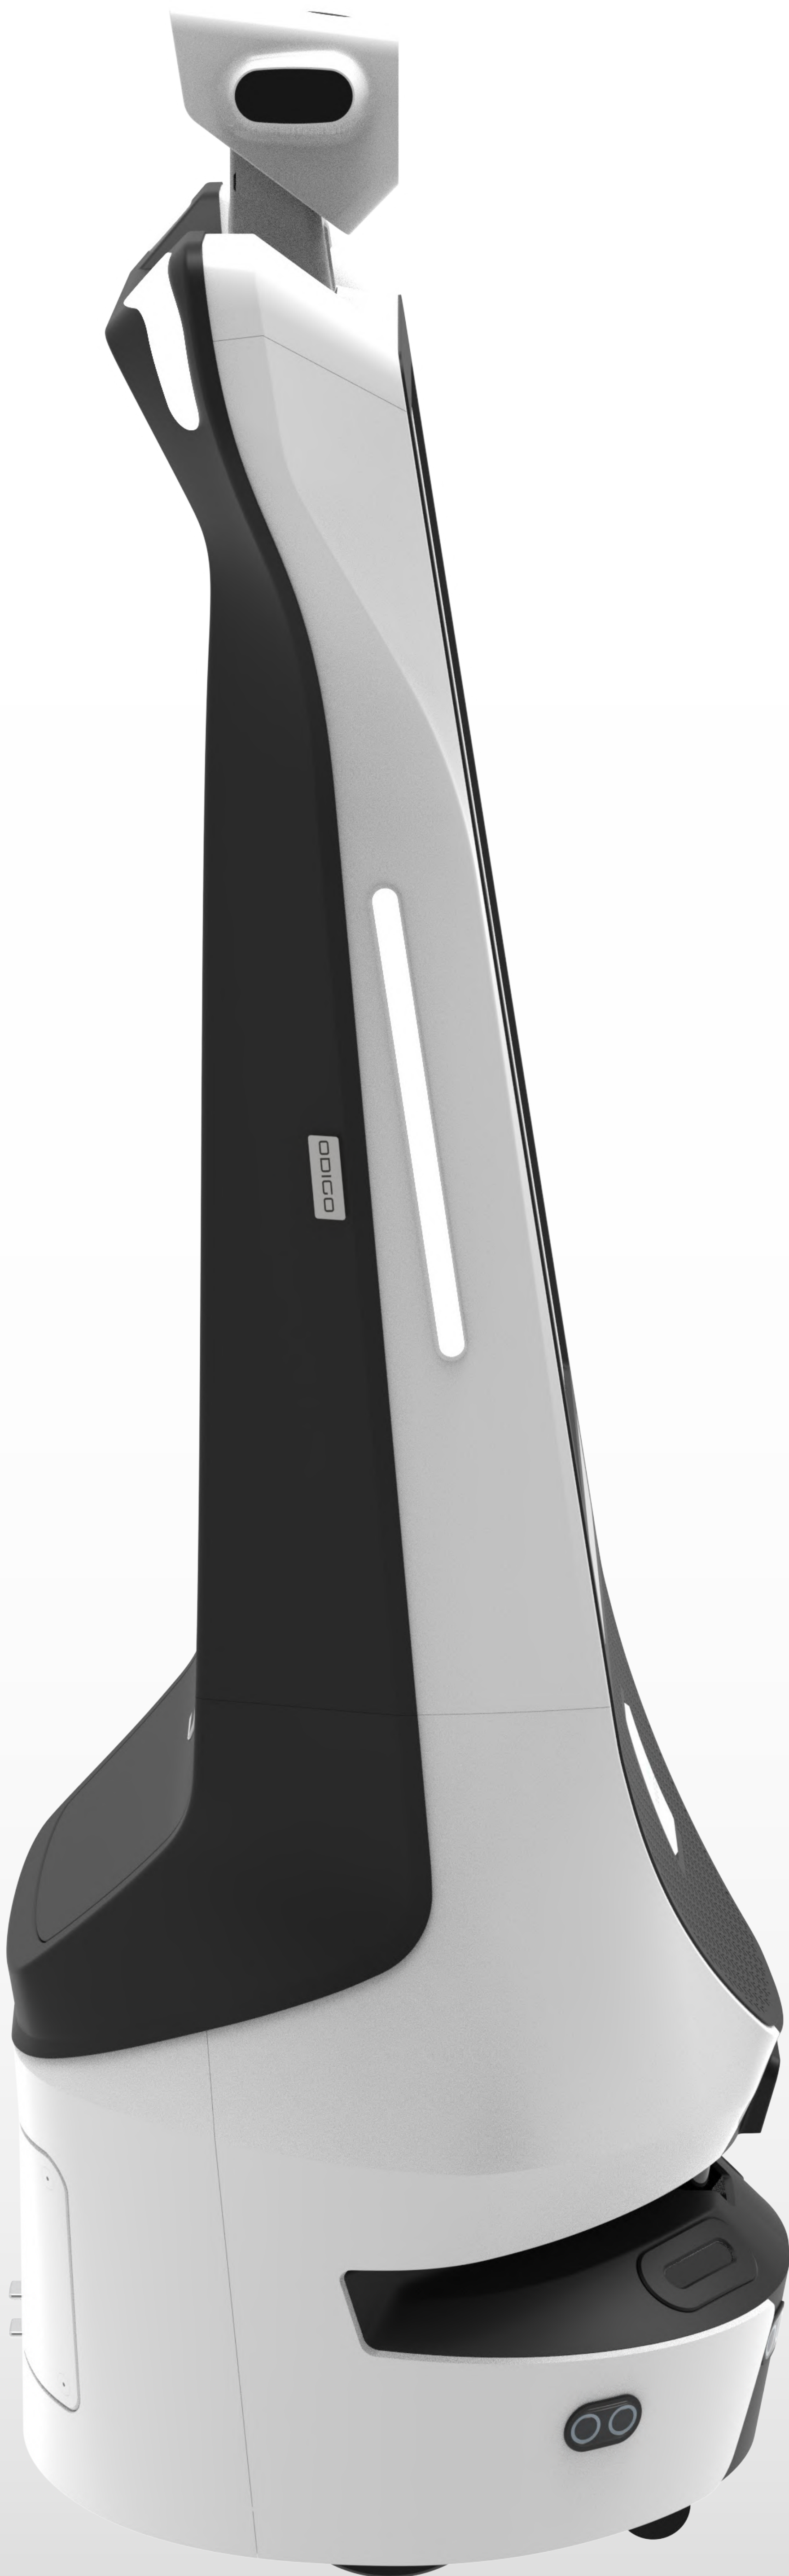

Functional Highlights

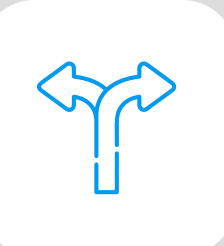

Other Key Features

- Automated Charging
- Upto 10 hour Battery Life
- Centralized Dashboard
- Anti-Fall Sensing
- Smart Obstacle Avoidance
- Customizable Speed Settings

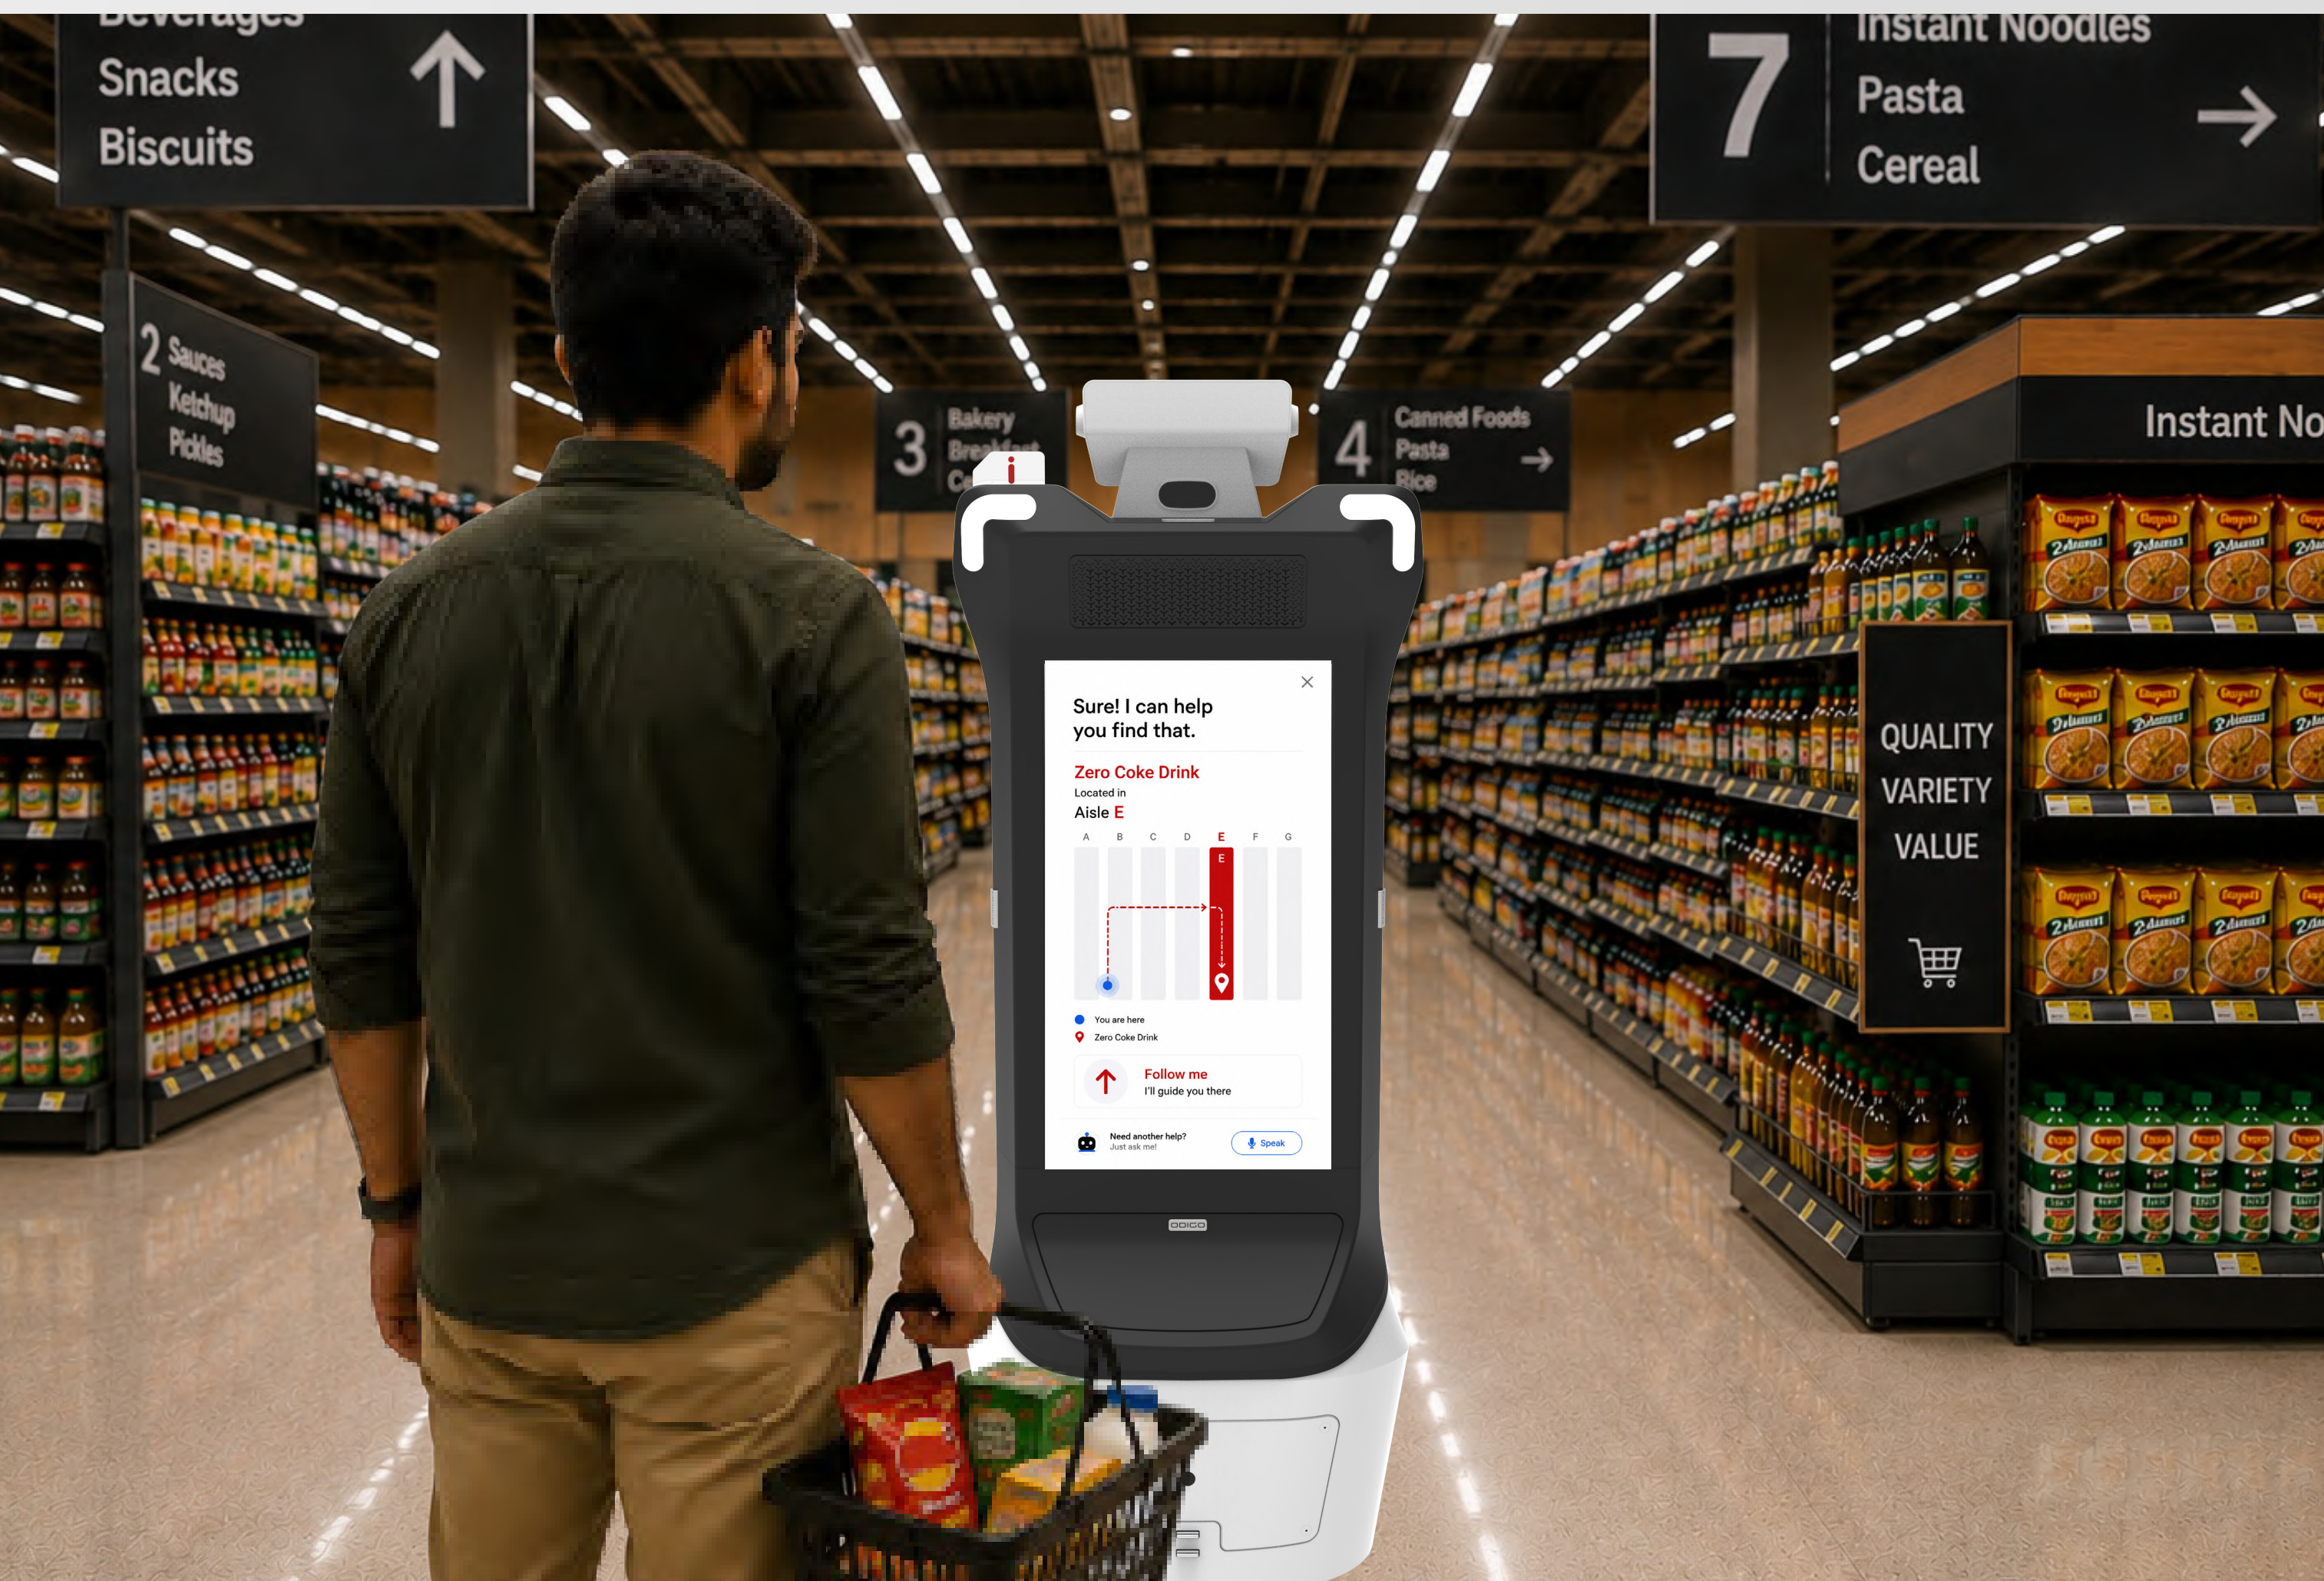

MAKE EVERY AISLE MORE HELPFUL WITH ODIGO

Product Discovery & Wayfinding

Help shoppers find what they need without leaving them to search the store alone.

- Searches products by name, aisle, or zone
- Solves location and service-related queries
- Physically escorts shoppers to their destination
- Supports multi-zone and multi-stop journeys

Interactive Product Exploration

Give shoppers useful information while they are deciding what belongs in their basket.

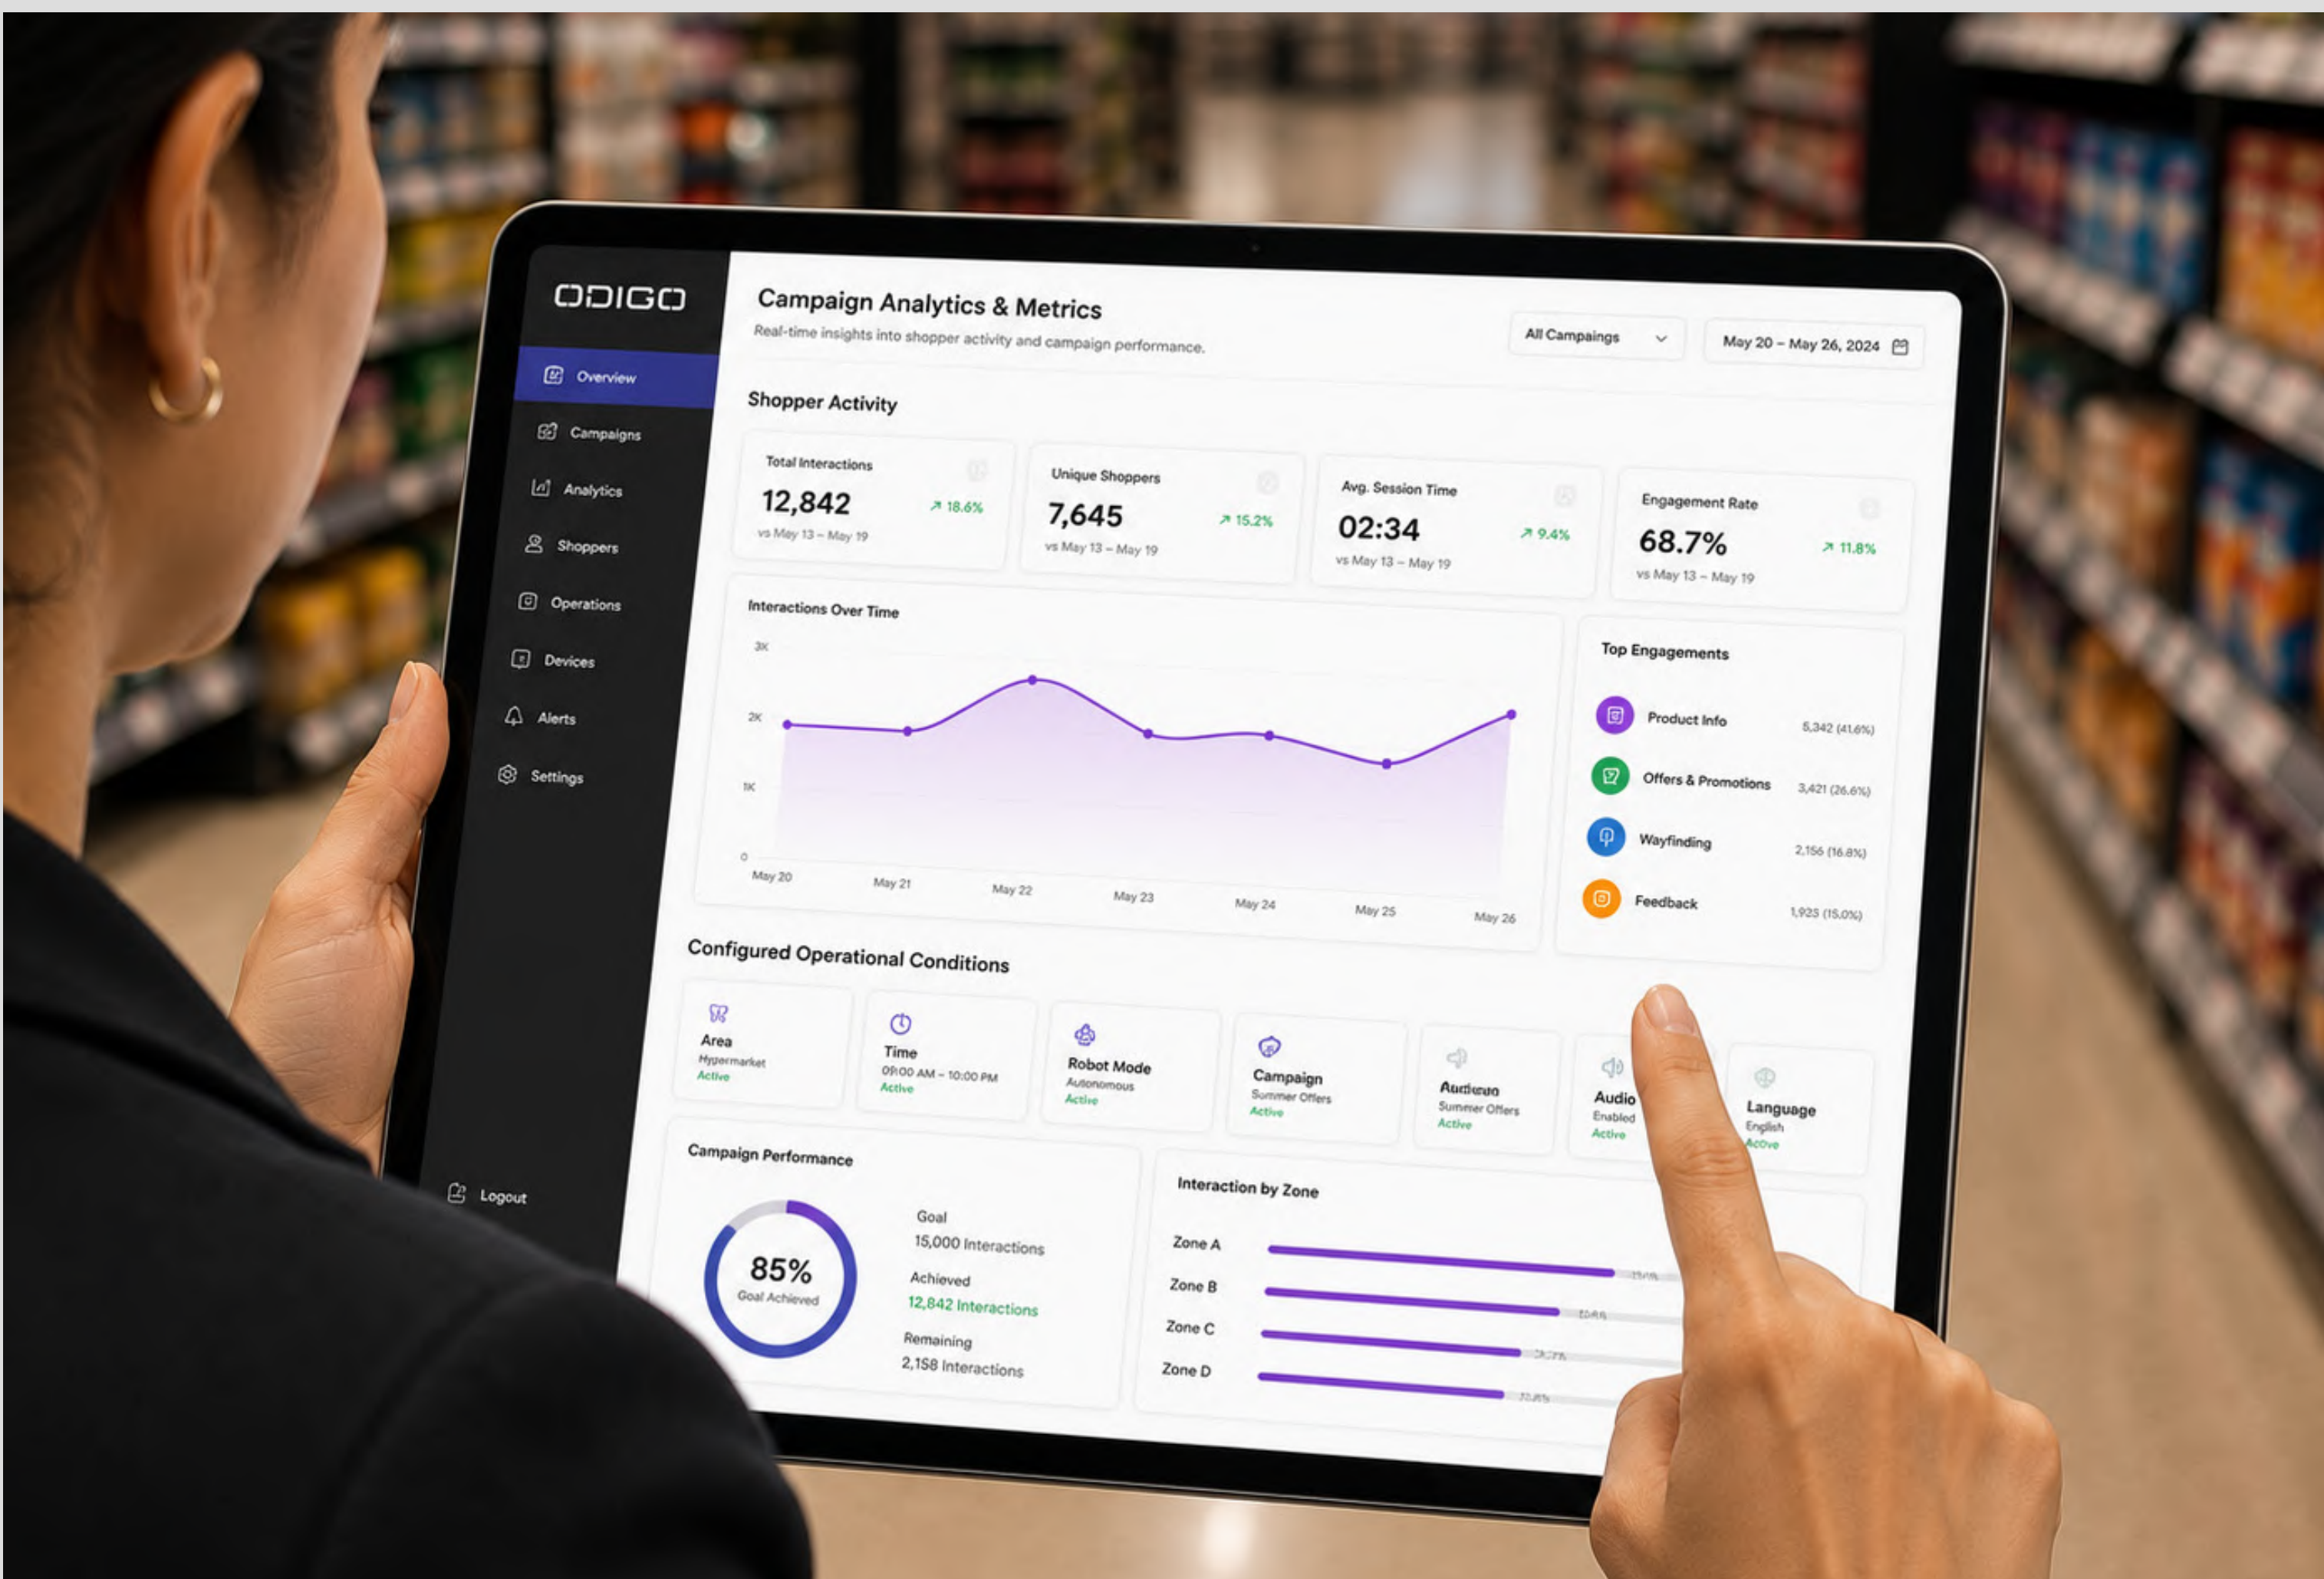

- Displays configured nutritional information
- Presents ingredients and product attributes
- Shows ratings and relevant product details
- Recommends suitable alternatives and available offers

Mobile Promotions & Retail Media

Take promotions beyond a fixed shelf or screen and place them directly in the shopper's path.

- Displays daily offers, clearance, and seasonal campaigns
- Delivers different content by zone, route, and time
- Supports offers, taps, and QR engagement
- Records ad plays and proof-of-play for campaign reporting

Campaign Analytics & Metrics

Give supermarket teams useful signals and metrics about shopper activity and configured operational conditions.

- Tracks searches, interactions, and navigation requests
- Identifies popular destinations and usage patterns
- Monitors configured safety and security events
- Captures help tickets, feedback, and recurring issue hotspots

DESIGNED FOR MODERN SUPERMARKET ENVIRONMENTS

Supermarkets need more than another digital display. They need assistance that can move through the floor, interact with shoppers, carry relevant promotions, and provide useful visibility while operating as part of the store environment.

Odigo combines autonomous navigation, interactive assistance, mobile advertising, safety monitoring, and centralized management in one platform.

Key Applications

Product Discovery & Shopper Guidance

Make finding products and services easier across large or unfamiliar store layouts.

- Search for products and receive aisle-level guidance
- Escort shoppers directly to selected destinations
- Guide visitors to pickup, service, pharmacy, or exits
- Support multi-item shopping routes across store zones

Promotion & Retail Media

Give brands and supermarket teams a moving advertising surface across the store.

- Run offers by zone, route, time, or campaign
- Display promotions during continuous cruise-mode patrols
- Trigger location-specific interactive experiences
- Measure ad plays, taps, QR events, and proof-of-play

Shopper Assistance & Store Engagement

Give shoppers an accessible point of help without requiring an app or account.

- Answer routine questions through voice or touch
- Provide product, service, and store information
- Support multilingual conversations with spoken-language detection
- Capture ratings, feedback, forms, and help requests
